The Journal of General Psychology, 1998, *125*(4), 408–410

Index to Volume 125

This annual index is organized by first author and by title. Page numbers refer to the following issues:

Number 1 (January): 1–104
Number 2 (April): 105–208
Number 3 (July): 209–292
Number 4 (October): 293–412

AUTHOR INDEX

Ang, R. P. *Use of the jackknife statistic to evaluate result replicability.* 218–228.

Bar-Eli, M., Lidor, R., Yaaron, M., Goldstein, S., Erlich, I., & Dunsky, A. *Performance of pilots and nonpilots on an attention-determined psychomotor task.* 305–316.

Bjork, J. M., Dougherty, D. M., Huang, D., & Scurlock, C. *Self-reported impulsivity is correlated with laboratory-measured escape behavior.* 165–174.

Blake-Mortimer, J. S., Winefield, A. H., & Chalmers, A. H. *The effect of depression in an animal model on 5′-ectonucleotidase, antibody production, and tissue ascorbate stores.* 129–146.

Bowers, C. A., Milham, L. M., & Price, C. *Dual-task results and the lateralization of spatial orientation: Artifact of test selection?* 5–16.

Corey, D. M., Dunlap, W. P., & Burke, M. J. *Averaging correlations: Expected values and bias in combined Pearson rs and Fisher's z transformations.* 245–261.

Downey, R. G., & King, C. V. *Missing data in Likert ratings: A comparison of replacement methods.* 175–191.

Dunlap, W. P., & Landis, R. S. *Interpretations of multiple regression borrowed from factor analysis and canonical correlation.* 397–407.

Ferraro, F. R., Orvedal, L., & Plaud, J. J. *Institutional review board issues related to special populations.* 156–164.

Finkelstein, L. M., & Burke, M. J. *Age stereotyping at work: The role of rater and contextual factors on evaluations of job applicants.* 317–345.

Giancola, P. R., Reagin, C. M., van Weenen, R. V., & Zeichner, A. *Alcohol-induced stimulation and sedation: Relation to physical aggression.* 297–304.

Hickman, K., Stromme, C., & Lippman, L. G. *Learned industriousness: Replication in principle.* 213–217.

Ikeda, S. *The process of translation between English words and Japanese words.* 117–128.

Kalamas, A. D., & Gruber, M. L. *Electrodermal responses to implied versus actual violence on television.* 31–37.

Koivula, N., & Hassmén, P. *Central, local, and overall ratings of perceived exertion during cycling and running by women with an external or internal locus of control.* 17–29.

Lee, J. A., Jr., Armus, H. L., & Miller, W. S. *Effects of frustration increase and decrease on percentage of short interresponse times.* 347–353.

Hickman, K., Stromme, C., & Lippman, L. G. *Learned industriousness: Replication in principle.* 213–217.

Ikeda, S. *The process of translation between English words and Japanese words.* 117–128.

Kalamas, A. D., & Gruber, M. L. *Electrodermal responses to implied versus actual violence on television.* 31–37.

Koivula, N., & Hassmén, P. *Central, local, and overall ratings of perceived exertion during cycling and running by women with an external or internal locus of control.* 17–29.

Lee, J. A., Jr., Armus, H. L., & Miller, W. S. *Effects of frustration increase and decrease on percentage of short interresponse times.* 347–353.

Levy, G. D. *Effects of gender constancy and figure's height and sex on young children's gender-typed attributions.* 65–88.

Libkuman, T. M., Griffith, J., Wines, W. M., Dickel, M. J., & Doty, K. G. *Individual differences in arousal and accessibility to information in memory.* 367–395.

Main, K. M., Leland, L. S., Jr., & Bartlett, G. C. *The properties of one: Facial memory and the isolation effect.* 192–206.

Mallet, P., & Schaal, B. *Rating and recognition of peers' personal odors by 9-year-old children: An exploratory study.* 47–64.

Otani, H., & Griffith, J. D. *Hypermnesia for prose.* 147–155.

Reinhardt-Rutland, A. H. *Sensitivity in changing-loudness aftereffects as indicated by an adjustment procedure: Implications regarding mechanisms.* 229–244.

Renner, M. J., & Pierre, P. J. *Development of exploration and investigation in the Norway rat* (rattus norvegicus). 270–291.

Saliba, A. J., Henderson, R. D., Deane, F. P., & Mahar, D. *The Arousability Predisposition Scale: Validity and determinants of between-subject variability.* 263–269.

Schweizer, K. *Complexity of information processing and the speed–ability relationship.* 89–102.

Sharps, M. J., & Pollitt, B. K. *Category superiority effects and the processing of auditory images.* 109–116.

Tiwari, G., & Mandal, M. K. *Side bias in schizophrenia: Hand, foot, eye, and ear.* 39–46.

Wilson, C., Cswaykus, D., Brocher, N., & Koenning, D. *Effects of atropine on measures of behavioral arousal in rats.* 355–365.

TITLE INDEX

Age stereotyping at work: The role of rater and contextual factors on evaluations of job applicants. *Lisa M. Finkelstein & Michael J. Burke.* 317–345.

Alcohol-induced stimulation and sedation: Relation to physical aggression. *Peter R. Giancola, Charles M. Reagin, René V. van Weenen, & Amos Zeichner.* 297–304.

The Arousability Predisposition Scale: Validity and determinants of between-subject variability. *Anthony J. Saliba, Ron D. Henderson, Frank P. Deane,& Doug Mahar.* 263–269.

Averaging correlations: Expected values and bias in combined Pearson *r*s and Fisher's *z* transformations. *David M. Corey, William P. Dunlap, & Michael J. Burke.* 245–261.

Category superiority effects and the processing of auditory images. *Matthew J. Sharps & Brent K. Pollitt.*109–116.

Central, local, and overall ratings of perceived exertion during cycling and running by women with an external or internal locus of control. *Nathalie Koivula & Peter Hassmén.*17–29.

Complexity of information processing and the speed–ability relationship. *Karl Schweizer.* 89–102.

Development of exploration and investigation in the Norway rat (*rattus norvegicus*). *Michael J. Renner & Peter J. Pierre.* 270–291.

Dual-task results and the lateralization of spatial orientation: Artifact of test selection? *C. A. Bowers, L. M. Milham, & C. S. Price.* 5–16.

The effect of depression in an animal model on 5′-ectonucleotidase, antibody production, and tissue ascorbate stores. *J. S. Blake-Mortimer, A. H. Winefield, & A. H. Chalmers.* 129–146.

Effects of atropine on measures of behavioral arousal in rats. *Christopher Wilson, Dawn Cswaykus, Nicole Brocher, & Denise Koenning.* 355–365.

Effects of frustration increase and decrease on percentage of short interresponse times. *John A. Lee, Jr., Harvard L. Armus, & Wendy S. Miller.* 347–353.

Effects of gender constancy and figure's height and sex on young children's

gender-typed attributions. *Gary D. Levy.* 65–88.
Electrodermal responses to implied versus actual violence on television. *Alicia D. Kalamas & Mandy L. Gruber.* 31–37.
Hypermnesia for prose. *Hajime Otani & James D. Griffith.* 147–155.
Individual differences in arousal and accessibility to information in memory. *Terry M. Libkuman, James Griffith, William M. Wines, Michael J. Dickel, & Kimberly G. Doty.* 367–395.
Institutional review board issues related to special populations. *F. Richard Ferraro, Laurie Orvedal, & Joseph J. Plaud.* 156–164.
Interpretations of multiple regression borrowed from factor analysis and canonical correlation. *William P. Dunlap & Ronald S. Landis.* 397–407.
Learned industriousness: Replication in principle. *Karen Hickman, Cory Stromme, & Louis G. Lippman.* 213–217.
Missing data in Likert ratings: A comparison of replacement methods. *Ronald G. Downey & Craig V. King.* 175–191.
Performance of pilots and nonpilots on an attention-determined psychomotor task. *M. Bar-Eli, R. Lidor, M. Yaaron, S. Goldstein, I. Erlich, & A. Dunsky.* 305–316.
The process of translation between English words and Japanese words. *Satoko Ikeda.* 117–128.
The properties of one: Facial memory and the isolation effect. *Kathryn M. Main, Louis S. Leland, Jr., & Gary C. Bartlett.* 192–206.
Rating and recognition of peers' personal odors by 9-year-old children: An exploratory study. *Pascal Mallet & Benoist Schaal.* 47–64.
Self-reported impulsivity is correlated with laboratory-measured escape behavior. *James M. Bjork, Donald M. Dougherty, David Huang, & Corey Scurlock.* 165–174.
Sensitivity in changing-loudness aftereffects as indicated by an adjustment procedure: Implications regarding mechanisms. *Anthony H. Reinhardt-Rutland.* 229–244.
Side bias in schizophrenia: Hand, foot, eye, and ear. *Geetika Tiwari & Manas K. Mandal.* 39–46.
Use of the jackknife statistic to evaluate result replicability. *Rebecca P. Ang.* 218–228.
